

CORRELATION OF
CUSTOMS TARIFF
BETWEEN
2024-2025

ABSTRACT

Correlation between the Tariffs at the eight-digit level documenting the manner in which the commodities covered by Tariff of 2024 have been accommodated in the Tariff of 2025.

Tariff Unit, Customs Policy Wing

Room No. 229-A, North Block, New Delhi

Correlation of Customs Tariff between 2024-2025

The WCO Convention on Harmonized Commodity Description and Coding System (the HS Convention) came out with the Harmonized System (HS) Nomenclature in order to facilitate the standardization of trade documentation and the transmission of data. The HS Nomenclature forms the basis of national Customs Tariff of over 200 nations, including India. The new edition of the Correlation-2025, shall come into force from 1st May, 2025.

For ease of transition to the ITC (HS), 2025, an exercise to correlate the tariffs at the eight-digit level has been undertaken by this office. The Correlation table (Annexure-II) presents the correlation between the tariffs at the 8-digit level documenting the manner in which the commodities covered by tariff of 2024 have been accommodated in the tariff of 2025.

To understand the extent of changes between the two versions, a 'Correlation Code' has been provided against each correlation entry. The Explanation on the Correlation Code is given in Annexure-I. The Correlation table between Indian HS version of 2024 and 2025 is enclosed in Annexure-II.

While all efforts are made to ensure correct, complete and current information on the correlation, it may be noted that this document is to be construed only as a guide for the sole purpose of facilitating transposition across different versions of Harmonized System. It has no legal status. Only those amendments which are notified in the official gazette shall have legal force. CBIC shall in no circumstances be liable for any errors or omissions in the content furnished. For any queries, Tariff Unit, CBIC may be contacted: tariffunit-rev@nic.in

Annexure-I

Guidance Note on the Correlation Table

1. The HS Versions of Tariff is denoted by the year of its Publication (i.e Tariff 2024 or 2025). The Correlation Table always provides the extent of correlation between two HS Versions and the extent is qualified by way of correlation code.
2. For Correlation Table of 2024-2025, 2024 HS version is denoted as LHS and 2025 HS version is denoted as RHS.
3. The Correlation code consists of **two-alphabet nomenclature** to represent the extent of changes between the versions being compared.
4. The **first alphabet** indicates the extent of matching of the tariff entries between the two HS versions under comparison.

First Alphabet	Indication remarks
S	Coverage is identical. It can be correlated 1-1.
D	Coverage differs. Scope is either widened or shrunk.
N	New entry is added in the HS version on RHS. This Tariff item never existed in the HS version of LHS.

5. The **second alphabet** compares the extent of coverage of goods of a tariff entry in the HS version in Right hand side column compared to tariff entry of the HS version in Left handside column.

Second Alphabet	Indication remarks
F	Tariff Entry at RHS is fully covered within Tariff entry at LHS.
P	Tariff Entry at RHS is only partially covered within Tariff entry at LHS. In other words, Tariff entry at RHS is covered by more than one Tariff Entry in LHS.

6. Based on the above nomenclature, one of the five “**two-alphabet correlation code**” is attributed to each tariff entry, as follows:

Correlation Code	Remarks
SF	RHS has Identical coverage with LHS. Direct 1-1 correlation.
DF	RHS Coverage differs, but relatable only to one entry at LHS.
NF	RHS Tariff is new, but relatable only to one entry at LHS.
DP	RHS Coverage differs and relatable to multiple entries in LHS.
NP	RHS Tariff is new and relatable to multiple entries in LHS.
